## Affective Assessment Tool:

Questionnaire Development and Data Collection

In this study, a set of questionnaires was used as an instrument or tool to the main factors affecting the selection of courses related to food services among male students in vocational colleges. For this study researchers have chosen to develop questionnaire items designed using Likert scale. The selected Likert scale is an easier scale to be used to carry out this study and respondents only need to choose one answer only. In addition, the questionnaires that will be distributed to this respondent have chosen the five-point Likert scale to measure or obtain analysis findings.

## Result and Discussion:

1. Identifying Interest Factors Encourages Male Students in The Selection of Courses Related to Food Service.
2. Identifying parents' Factors Involved in Determining the Selection of Courses Related to Food Services
3. Identifying Career Choice Factors Affects the Selection of Courses Related to Food Services
4. Identify the Differences between the Major Factors Affecting the Selection of Courses Related to Food Services

## Conclusion:

This study has provided answers to questions related to the major factors affecting the selection of courses related to food services among male vocational colleges  
The results of the study found that the selection of courses related to food services was influenced by interest factors, parents influence factors and career choice factors in vocational colleges by obtaining a high number of high scores

## Recommendation :

Some suggestions for vocational colleges and parents have also been submitted. Further research proposals to future researchers have also been proposed to assist in conducting more extensive research in various areas and areas. The study should not only focus on one place but should be further developed to improve the quality of the study

## Reflection:

As someone who also studies related to food service, this research gave me an insight into the different factors why students make the choice to venture into the field of food service. They mentioned that interest and parents involvement are some of that. For my own experience, some of the reasons why I chose to study food service are my interest and the connection I found with food. I want to explore different techniques and learn more concepts and skills about the art of culinary and hoping someday that all I've learned will eventually become a reality and apply in real-world context.
